warhammer 40 000 space wolf - sigurd ironside

Overdosed is a very fast paced game with a unique theme that helps to make it even more entertaining. It's got two game modes that you can sink a lot of time into perfecting, and the price is on-point. Lots of entertainment for only \$7! See my full review here: <https://www.youtube.com/watch?v=yN6ZwIraIIU>. Fun game, picked up for a couple bucks on sale. Wasnt disapointed, would like to see perhaps other types of this game, maybe even a silk road expansion.. Challenge: Not getting distrackted. Worthy to buy in a sale. Please add more characters and achievements/badges..

This game really isn't that good. Check out why in the video.. Pros:

Quick to get in and out of for a burst of action and loading times are negligible.

Only jump back to the default environment was when firing a rocket the first time in a session, otherwise, the game has been running rock solid.

No MS for me, though YMMV (I'm not easily nauseated)

Dev was quick to incorporate dual-joysticks when asked

Cons:

Graphics are a bit spartan

While voice acting is of good technicality, it does come off a bit stilted

Bottom Line: Good fun for the price, but don't go in expecting Elite: Dangerous. Does what it says on the tin. Recommended.. Its a zombie jigsaw puzzle game. To make it more challenging and interesting, there are zombies that you have to kill while trying to complete each puzzle. The puzzle pieces float around in a "stream" and at times it can be frustrating trying to pick up a certain puzzle piece. Its a fun game if you like puzzles. 8/10. I'm not usually one to write reviews but I really want to support this game. I've had so much fun playing with my brother and I know he has too. This is a great game, especially considering the fact that it's still in early access. Can't wait to see the final product!

Pros

- The game runs very smooth and looks great visually

- Split Screen option

- Good customization options

- Every map feels unique

- So far, I have only been met with a couple minor bugs

Cons

- My only gripe is that I wish it had more content in the way of maps and game-modes.

. Very nice atmosphere and story-it has minor bugs-but it has one major lack of alive beings. There's no other human and no animals while you were walking for nearly 5.5 hours.. This game is a collection of mini-games with our very well-known famous cartoon heroes.

It's OK for little kids to play and have some fun out of this game, better yet if played in company.. This game is amazing, it just has to be your kind of game, and you'll spend hours on it. I personally really love it, because of the ways you can play it. Some days i love soaring through the canyon at 90 km/h, while sometimes i feel more like getting the highest amount of points in a level. The controls are neat for if you are at school, and can't use a mouse, even though i prefer controller. The community is lit, and the devs are active which makes it a very personal game.

And remember, this is the beta we're talking about. Full game coming out tomorrow ^-^

10/10 would recommend

**BEST THING EVER!!!**

You can be RUSKI and True SLAV whith this pack

Wuld recomend!!!!. Has nothing to offer besides a nice art style, the gameplay is boring and repetitive.. not quite the game for me graphics and game play were lacking. WOW, worst game ever, I have never played such a terrible game in my entire life, espically the fact that I wasted 7USD on this game, and that was during a discount (The original price was 10 bucks!). Even if I got this game for free it will still be terrible. **DO NOT GET IT.** Good concept, horrible execution. First of all there is no single player option, you have to play with someone online, and there is rarely anyone on. I either don't know how to click a trigger (I do) or the trailer and \*nearly\* every bit of it was misleading. I didn't manage to get anything out of it, because it's a shooter game that you can't shoot in.

Pros:

Refund button works

Cons:

There is no option to play against a computer, you have to wait for an online player which took me a while.

The sound doesn't work, I am 100% sure it is not my problem but the game's.

The moving system takes a long time, when you're in the middle of a battle field, you rarely have time to wait for an animated figure to move first.

Pretty much everything is glitchy, from selecting weapons, to just moving the controllers

The lag is real.

When I was shooting the cross was red and it was in the targets direction, and nothing happened, then I procceded to die on and on and on again.

The haptic feedback was out of sync, it would vibrate seconds after the actual firing happened

In conclusion, don't get it absolute waste of money, I will not be looking forward to playing this again, and defenily won't be recommending this to any one who owns a Vive.. Really fun little roguelike. I enjoyed it so much I bought it on Android to play on the move, which is actually where I've spent most of my time playing. It's just the right level of 'deep' to be fun without being overwhelming.
