The Good:

- -Fast learning curve.
- -Tons of action and destruction.

The Bad:

-Short.

-Grinding through previous levels.. It's both a pleasure to ZOOM through this game as well as take your time to smell the Bobos. As you start to realize how your choices affect the progress and atmosphere of your garden, you begin thinking about what you'd like to try different in your next garden. With an extensive cast of colorful monsters, you're sure to find a new friend every time through.. I'm a huge fan of Portal, Talos Principle, and Turing Test but I just didn't like this at all. The narrator drove me nuts and I simply didn't like the mechanics of the game. It does have some nice imagery though.. If you like arcade racing, or just racing in general, Aqua Moto Racing Utopia might be a game for you. It's easy to pick up and you'll learn the basics in no time, but with the wave physics and stunts for charging up turbo, you always have room for improvement.

I'd say it's a game for both casual and competitive players. The Championships are fun and engaging (and many). For the more hardcore players there are weekly challenges, where you get to play one track and try to get as good a time as possible. You get one attempt per day, so make it count! You do, however, get as many practise runs as you like. The winner each week receives a real-life medal, which is neat to say the least. Challenge a friend and let the banter commence!. Lovely little engine ideal dock and shunting work.. if you love fire emblem then your really going to enjoy this game. The complete soundtrack doesn't include every song in the game

hmmmm

Surprisingly fun little game, definitely worth a few bucks if you can find on sale.. promblem with No opponents

Couldn\u00b4t find a worth opponent

wfftt..:-V

cant not work loading..... Sherlock Holmes: The Silver Earring is a point and click puzzle game about the famous detective, Sherlock Holmes, solving a murder case.

This game is not bad, the first part (Day 1) is the best part since you control Sherlock holmes in the crime scene collecting evidence and questioning people. But it starts falling apart near the end when the plot becomes complicating and everything stops making sense.

The graphics were so dated but I understood since it was released back in 2004 but it looks a bit too dated like N64 graphics and the shadows were bad and sometimes the shadows get stuck into objects (yeah sounds stupid, I know) and the lighting was really bad, its either too dark or too bright.

And don't get me started on the voice acting, the quality was horrible for most of the characters and the dialog sounded like it was read by people reading news papers with ZERO emotions, specially the main villain, he sounded like he was recording for a commercial. The music sometimes was louder than the dialog and was annoying sometimes.

The animation was basic with the main charaters having a Tank-like motion and the sometimes controlling was very bad specially with the timing parts.

I ONLY RECOMMEND this game for the people who like mystery games and solving crimes but the game itself wasn't that good.. A mix of "casual" genres, including the dreaded pixel-hunt, er, hidden object aspects. There isn't much strategy at play here: buy low, sell high. For the achievement \(\nabla \psi \nabla \nabla

I played around with it for about 30 minutes. To my understanding: to place beats, you hit the trigger and it randomly creates one of the 3 types: red circle (high), green triangle (medium), blue square (low/drums). Then you activate it in your song by hitting it against a previously placed note.

Honestly I'm still not 100% sure how it works. I'd like to see a tutorial, and I'd also like to be able to customize the notes more once they're placed. Like change the pitch or volume, maybe using the height they are placed at?

Still its simple enough that anyone can hop in and mess around and make some neat compilations. There is an underlying automatic track that kicks in that brings it all together so no matter what you do it still sounds okay.
